

Third Announcement

Dear Colleagues, Dear Friends

On behalf of the Organizing Committee we would like to remind you that 9th Polish-German Symposium on Pharmaceutical Sciences “Towards novel concepts in pharmaceutical sciences” is coming and share some information about the progress in organization.

We are very grateful to main speakers, well known professors-experts, which will give plenary lectures on hot topics, for accepting our invitation. The final program consists of plenary lectures in different areas of pharmaceutical sciences but there is also an emphasis to give younger colleagues an opportunity to present the results of their investigations in form of oral contributions (15-minutes) and poster presentations. During the poster session selected research will be presented in the form of short oral presentation (3 min).

We hope, that both, scientific programme and social events as welcome party in The Museum of Pharmacy and gala dinner in Wieliczka Salt Mine will be a time to fruitful discussion and development of scientific network and friendship between our teams.

We look forward to welcoming you to Krakow!

With best regards,

Organizing Committee
