

Biochemical Laboratory Terms and Conditions

1. Pharmaceutical Biochemistry Classroom is open only on days of exercises in designated hours. Students who are not booked for classes and unemployed people are not allowed to enter the classroom.
2. Students are required to wear lab coat, safety goggles, gloves and appropriate footwear, during the classes.
3. Do not eat, drink or smoke in the classroom, and after completing the exercise, wash your hands thoroughly.
4. Hazardous substances should be handled in accordance with the information provided in the instructions for each exercise.
5. Acids, bases, organic solvents and materials contaminated with carcinogenic reagents should be disposed of in specially labelled containers.
6. Microorganisms and genetically modified materials should be placed in designated containers for inactivation (autoclaving).
7. Lab tables, shelves and reagent cabinets should be kept in order. After finishing work, each student is obliged to clean up the place where he worked.
8. All used devices should be left turned off and in good order.
9. For all random incidents (cuts, burns, etc.), noticed dangers, irregularities or damage (glass breakage, damage to the apparatus) that occurred during the exercise, you should immediately notify the assistant.
10. Students are obliged to adhere to other ordinances of the assistant conducting the exercises.

I agree with the rules outlined above and I agree to comply with them during the course of "Biological Basics of Pharmaceutical Sciences – Basics of Biochemistry"
